Proportional Giving Table (on the back of this card)

This Bible challenges us to begin to think of our giving in terms of percentages or in proportion to what we have been given by God. Naturally, not everyone is able to tithe immediately, but everyone needs a plan to reach their intended goals. *You might consider using this chart as you prayerfully consider your family's plan to reach the Biblical tithe. For example: if your income is \$800 per week and you are currently giving \$40 per week (5% of your income), an increase of 1% (to 6% of your income) would result in giving \$48 per week.*
